

ONE-OF-A-KIND INNOVATION. TWO TIMES THE FLEXIBILITY.

Only Vulcan steams like this. With exclusive, patented innovations, Vulcan builds powerful, durable, and efficient steamers with a low total cost of ownership. Our twin generator electric floor steamers let you operate efficiently by using just one cavity when that's all that's needed, or both for maximum output. Dual-generator flexibility puts productivity first.

VULCAN ET SERIES FLOOR STEAMER

With individual cavity generators that offer separate control for independent operation, Vulcan ET electric floor steamers give your kitchen the flexibility it needs to steam a little or a lot, save energy, and work faster. Available in 6- and 10-pan capacities.

	ADVANTAGE	BENEFIT
Exclusive Smart Fill technology	<i>Initial high-speed water "power fill" reduces startup time. Low-water probe automatically initiates an auto-staged "trickle fill" to maintain volume—and boil—once steam production is under way.</i>	Accelerate your kitchen with faster startup and continuous steam generation for nonstop cooking performance. Long live the boil.
Exclusive SmartDrain™ and PowerFlush™ technology	<i>Sloped bottom, positive water pressure, and Venturi effect combine to power flush the generator, reducing scale buildup and likelihood of backup when powering down.</i>	Keep your kitchen working by keeping your generator clean. Less routine maintenance and downtime means less costs related to descaling and repairs. Waste removed is from the steamer, not your wallet.
Twin generators with independent controls	<i>Individual cavity generators offer separate control for independent operation.</i>	Operate efficiently by using just one cavity when that's all that's needed, or both for maximum output. Dual-generator flexibility puts productivity first.
Exclusive fully integrated SonicSafe™ technology*	<i>Prevents scale buildup inside the twin generators by using sound waves to create millions of microscopic bubbles that cling to dissolved minerals.</i>	Use your steamer as much as you want without worrying about fatal scale buildup. Experience less downtime and better performance without ever having to change a scale prevention filter again.
