Vulcan-Hart Co.

Made to Drain

The high-capacity strainer tray runs continuously through the bottom of floor troughs. Water from food waste and surrounding areas percolates through the strainers, eliminating dams and strainer clogs. This allows drain water to flow freely to the building drain.

Vulcan-Hart Co.

The Energy Star-qualified PowerFry 5 Fryer features a SoftStart ignition system that helps gently heat cold oil, extending the shortening's life. With flue temperatures of less than 500 degrees F with a full load, the fryer can reduce ventilation hood and air conditioning operating costs. A low idle rate reduces gas consumption and saves energy.
