Mini cast iron servers are suitable for small plates, sides, snacks, sauces, appetizers, dips and desserts. Various sizes of rustic cast iron pieces are available, including oval servers, round servers, rectangular servers, square skillets, round fry pans, cast iron pots, round mini skillets and mini rectangular servers with three dipping wells. Teflon handle covers for cast iron serving griddles make handling easy and are available in a variety of colors and styles. [www.tomlinsonind.com](http://www.tomlinsonind.com)

#### True Food Service Equipment Inc.

The TFP food prep table line features a stainless steel front, top and sides with an aluminum finished back. An 8-inch deep, full length removable cutting board made of sanitary, high-density, NSF-approved white polyethylene is standard. The forced air design moves cold air below the food pans to keep product temperatures between 33 degrees F and 41 degrees F.
